

# Crystal Impressions

In keeping with the AutumnWOOD tradition, we are pleased to present our new Crystal Impression Series. The handcrafted beveled glass is artistically mixed with a wide variety of textured glass. The appearance of this glass will change throughout the day as light moves around your home, creating stunning reflections from the crystal bevels.

All doors shown in this brochure are solid wood, available in your choice of knotty pine, oak, knotty alder, maple or select alder.

All AutumnWOOD doors are handcrafted to ensure sturdiness and stability in any climate throughout the country. Our solid wood doors are constructed in a butcher block fashion which releases the natural stress of the wood to prevent warping.
